PROFILE | Engineering and project-delivery leader with 17 years downstream manufacturing and oil & gas experience, driving brownfield capital execution, operational readiness, and crossfunctional program delivery across North America.

QUALIFICATIONS

Bachelor's Degree in Chemical Engineering | Professional Engineer (P.Eng.) | PMP Designation
Ten years managing up to \$50M budgets, reporting biweekly to leadership and key stakeholders
Lead crossfunctionally across engineering, commercial, operations, EPC, and technology teams

DIRECT DOWNSTREAM MANUFACTURING EXPERIENCE

Senior Project Engineer (Full-Time Consultant) | 2021 to Present

Shell Canada Products | Campbell Refinery, Bigcity, PV

- Lead engineering and execution planning for Renewable Diesel Phase 1 (TIC \$75–\$100M), coordinating design, constructability, and delivery sequencing, maintaining schedule integrity while controlling capital exposure
- Drive project execution by translating scope into actionable work packages, applying engineering due-diligence to influence cost reductions and mitigate constructability risk in a live operating facility
- Govern EPC performance through structured design reviews, execution readiness checks, and stakeholder alignment sessions, maintaining safety standards while accelerating decision velocity across engineering, commercial, and operations teams

Senior Refinery Consultant (Part-Time / Ad-Hoc) | 2020 to 2021

Denton Site Ltd., Bigcity, PV

- Aligned engineering, operations, and contractors through disciplined communication cadences and execution frameworks to direct brownfield refinery projects under \$2M, maintaining delivery momentum across multiple concurrent initiatives

Project Manager | February 2011 to January 2012

Vertigo Energy Zenith Refinery | Bigtown, PV

- Delivered analyzer and sampling systems for ethanol and gasoline blending plus LPG mercaptan integration (~\$1M TIC) by coordinating design, construction sequencing, and commissioning, completing under budget and within schedule
- Built AFEs and contributed to sustaining capital planning by integrating asset condition data and preventative maintenance priorities into annual budgeting cycles
- Managed AFEs and contractor performance for secondments at Pengrowth and Centrica Energy, maintaining cost control and execution discipline across third-party delivery models
- Applied continuous improvement methodologies to streamline workflows, shorten execution cycles, and improve delivery predictability
